New York Ont. 23, 184, HOMER RAMSDELL, President.

BATRANIEL MARGIN Secretary.

The Money unarket is less stringent to-day than on

Saturday, but capital is still active at full rates. The report of the Banks showing a further decrease of \$1,423,000 in loans, making about three and a half millions in two weeks, together with the increased demand from the interior banks, is quite sufficient to account for the present stringency. The Banks will probably continue the policy of keeping down their leads until the actual suspension of specie shipments, or until the surplus of the arrivals from California hall have increased their specie resource again to deven or twelve millions. The California boats of the latinst, are fully due, and will probably increase our stock of gold about two millions, of which it is country. The weekly boats under the n-w arrange-ment commence, we believe, on the 20th just, from departed on the 20th.

Mr. S. C. Thompson, of the banking-house of J.

compson has left for Indianapolis to ascertain the unding and position of the Indiana free banks. Mr. compson appears to be determined to procure the denption of Indiana money, or place the banks in a hands of the Auditor for liquidation. The Wabsah Valley Bank at Legansport, Ind , has

en added to the Indiana banks which are bought in

Marie & Kaus, prepared for the steamer:
Nothing of particular importance has marked the
week. The temporary advance spoken of in our last
circular has been followed by a decline of 1 to 2 \$\psi\$ circular has been followed by a decline of 1 to 2 \$\varphi\$ cent. on the leading speculative stocks. As long as the export of our produce shall not have commenced, the disposition to contract on the part of our banks must maintain the existing scarcity of money and repress any permanent upward movement. In Railroads, Bones, with the exception of those of the Eric Railroads, which are always active, the sales have been very limited. In City and County Securities, on the contrary there have been several important transactions, especially in St Louis's Chadimant's, Milwankee's and Sacramento's. In State Stocks sales have taken place of Indiana's and Virginia's at a decline of 2 to 3 \$\varphi\$ cent. on our previous quotations.

The amount of business done in Exchanges is small and the raise show a downward tendoucy.

The Merchant's Insurance Company of Boston has declared a semi-annual dividend of 4 \$\varphi\$ cost payable on demand. The Outario Branch Bank a semi-annual

on demand. The Outario Branch Bank a semi-annual dividend of 5 \$\mathbb{P}\$ cent., payable Nov. 1.

The first division of the Cincinnati and Marietta

Railroad from its junction with the Little Mismi to Chillicothe, a distance of 70 miles, and 93 miles from Cinciunati, was opened on the 4th inst. with an ap-

Cincinnati, was opened on the 4th inst. with an appropriate celebration. In regard to this enterprise The Rathead Journal says:

"The completion of the first division of the Cincinnati and Marietta Railroad at once brings into profitable use the amount of money expensed on the centermetic of the first 70 miles. This dividon would pay without carrying it any further. It has now reached the heart of the Scioto Valley, and the center of an important trade. The trade and travel between Cincinnati and Chillicothe has been compelled to make the long disear of some hundreds of miles by way of the Ohio River and Canal, requiring days for a journey, is now reduced to a few hours, and less than 100 miles in distance.

"In a short time assector division of the road will be opened to the south western coal field of the State,

than 100 miles in distance.

"In a short time asseter division of the road will be opened to the south western coal field of the State, frem which Cincinnati draws its supply of this indispensable article. The road will then have a business derived from one of the best agricultural, and the ricbest mineral portion of the State.

"We understand from good authority that the road is being rapidly pushed forward to the Onio River at Marietta, and to Wheeling. When completed to both of these points, it will form the frusk to Cincinnati, both of the Baltimore and Philadelphia lines. The Pennsylvania Company has shown their appreciation of the value and importance of the Cincinnati and Marietta Raifread, by subscribing \$750,000 to its capital. The formar Company regards Wheeling as one of its watern termini equally with Pittsburgh. The former city is also the terminus of the Baltimore and Ohio Raifread. But Baltimore, for the purpose of securing the shortest route to Cincinnati, is building a sulfrond (the North Western) to strike the Ohio opposite Marietta Road a good share of the business travel between the seabord and the Great Valley. The road when completed will have a line of about 275 miles, and with cost, we should judge, something like \$30,000 \text{ miles.}

When the Marietta Road a good share of the business travel between the seabord and the Great Valley. The road when completed will have a line of about 275 miles, and with cost, we should judge, something like \$30,000 \text{ miles.}

When the Marietta Company is fortuna toly freed from the danger of competition of the shove road will go the toward supplying southern Ohio, amost the only portion of the State now in wast of such, with all its needs in the shape of realized facilities. The Marietta Company is fortuna toly freed from the danger of competition.

\$41,150. The Sub Treasury has a further recent across of \$550,000 in bars from Philadelphia, and a transfer of an equal amount of column to Philadelphia.

The Weekly Bank Statement anne gol shows a large variation from the statement of the previous week. The principal change has been in the Deposits which have fallen off three, and a half millions. posits which have failen of three, and a half millions, showing that the bank balar oes have been largely drawn down from the interior, and a more active use of capital in the City. The loss of deposits appears to he re been very general, the exceptions being only six. Ten of the Banks have lost over \$100,000 each, vix: The American Exchange, \$300,000; Commerce, \$431,000; American £822,000; New College \$431,000. public, \$349,500; Manhattan, \$197,600; Merchants',

\$251,000; and Union, \$122,000.
The Loans have been further contracted—over \$1,400,000—and the Specie shows a decrease of \$10,000, which is \$200,000 to \$400,000 less than was anticipated. With the large less of deposits and
